Manuscript submission

Dear Dr. Röseler,

I submit my manuscript, “No evidence of differences between hierarchical versus distinction relations in self-based ACT exercises: A critical reanalysis of Foody et al. (2013) and Foody et al. (2015)” for your consideration. The preprint DOI: <https://doi.org/10.31234/osf.io/ab7de>. I would like to apply for the open data and open code badges. There are no materials and the study was not preregistered. This lack of preregistration is stated in the preprint.

With regard to conflicts of interest, I include a statement in the manuscript that acknowledges that one of the coauthors of Foody et al. (2013) was my former PhD supervisor. I will leave it to the editor to determine whether you think this constitutes a COI or not, and whether this needs to remain in the COI statement.

Suggested reviewers:

- Raphael Merz r.t.p.merz@tue.nl (reproducibility and meta-science knowledge)
- Leonie Dudda dudda@essb.eur.nl (reproducibility and meta-science knowledge)
- Prof Lorenzo Lorenz-Luaces lolorenz@iu.edu (clinical research, knowledge of ACT/RFT)
- Dr Alison Stapleton dralisonstapleton@gmail.com (clinical research, knowledge of ACT/RFT)

Yours sincerely,

PD Dr Ian Hussey
Senior Lecturer in Digitalisation of Psychology
